

# TOTAL RECON 2.0

Total Vehicle Tracking from Start to Finish

Recon Status Overview

By knowing how long it takes to get a vehicle to the front lot, Total Recon 2.0 helps improve the time it takes to get it through recon.

## Total Recon 2.0 Overview

Total Recon 2.0 Software is a powerful tool used by GMs, Service Directors, and Pre-Owned Directors to monitor and manage vehicles undergoing the reconditioning process. Most dealerships typically rely on e-mail, Excel, and phones to communicate with various departments in order to locate vehicles during the reconditioning process.

Total Recon 2.0 is a highly visible and organized approach to tracking vehicles through the reconditioning process. With real-time information, each vehicle being reconditioned can be located at any time. This alleviates unnecessary time spent searching for a specific vehicle. Managers can also identify when the reconditioning process needs to speed up to improve overall performance.

## Software Highlights

- Enables vehicles to move through the reconditioning process faster
- Built-in Autotrader® vehicle scarcity report
- Instantly know a vehicle's status, location and recon completion date
- Reduces managers' time spent tracking down a vehicle
- Creates an efficient process of reconditioning vehicles
- Receive e-mail alerts 3 times a day showing all vehicles' status
- Works on mobile devices

Total Recon 2.0 saves you time, opens up more opportunities to do business, helps you sell more cars, and make money.
